

Fraction Comparisons that don't make sense

Connect

Comparison strategies

- ① longer fraction bar
- ② fraction on number line
- ③ partition drawings so both same denominator
- ④ more & less than $\frac{1}{2}$

I do

Mr Bullock and Dr Doblar had an eating contest. Dr Doblar ate $\frac{3}{5}$ of a large pizza. Mr Finch ate $\frac{7}{10}$ of a medium pizza. Who ate more pizza?

Mr Bullock and Dr Doblar had an eating contest. Dr Doblar ate $\frac{3}{5}$ of a large pizza. Mr Finch ate $\frac{7}{10}$ of a medium pizza. Who ate more pizza?

We do

On Monday Dr Doblar biked $\frac{3}{4}$ of the way to school before he needed a break. On Saturday, he rode $\frac{1}{2}$ way to Stone Mountain before he needed a break. Which day did he ride farther before he needed a break?

**You do together
on whiteboard**

$\frac{1}{4}$ of 4th graders wore jeans on Monday. $\frac{2}{5}$ of 5th graders wore jeans on the same day. Which grade level had more students wearing jeans?

**You do alone on
index card**

Ashleigh read $\frac{3}{5}$ of her AR book.
Rebecca read $\frac{5}{6}$ of a different book. Who read more?
